

FLOWPILOT — SAAS PRODUCT LAUNCH CAMPAIGN

1. Project Overview

Brand: FlowPilot

Product: An AI-powered project-management platform for small businesses and remote teams.

Target audience: Small-business owners, startup teams, remote teams, project managers, and freelancers managing multiple projects.

Project type: Self-directed portfolio project. FlowPilot is a fictional brand created to demonstrate copywriting and campaign development skills.

2. Main Customer Problem

Teams often use multiple separate tools for tasks, deadlines, communication, and project tracking. Work becomes scattered, deadlines can be missed, and people may spend too much time managing work instead of doing it.

3. Positioning

FlowPilot brings tasks, deadlines, communication, and project progress into one simple workspace.

4. Core Message

Less time managing work. More time getting work done.

5. Landing Page Copy

Hero

Your team's work, finally in one place.

Manage projects, deadlines, tasks, and team communication without jumping between different tools.

CTA: Start Your Free Trial

Secondary CTA: See How It Works

Problem Section

Your work shouldn't be scattered across five different apps.

Tasks live in one place. Messages are somewhere else. Deadlines are buried in calendars. Important updates disappear in chat.

FlowPilot brings everything together so your team can see what needs to happen, who's responsible, and what's coming next.

Benefits

Plan with clarity — See projects, deadlines, priorities, and responsibilities from one workspace.

Keep everyone aligned — Give your team one place to communicate and track progress.

Know what's happening — Get a clear view of project progress without chasing people for updates.

Spend less time managing — Automate repetitive project-management tasks and focus on meaningful work.

CTA Section

Stop chasing updates. Start moving projects forward.

Bring your team's work together with FlowPilot.

6. Google Search Ads

Ad 1

Headlines: Manage Projects Smarter | All Your Work in One Place | Try FlowPilot Free

Description: Manage tasks, deadlines and team communication from one simple workspace. Start your free trial today.

Ad 2

Headlines: Project Management for Teams | Stop Switching Between Apps | Start Free With FlowPilot

Description: Keep projects, tasks and communication organized in one place. Make teamwork simpler.

7. LinkedIn Ad

Your team shouldn't need five different tools just to manage one project.

FlowPilot brings tasks, deadlines, communication, and project progress together in one workspace.

Less searching. Less chasing. Less switching between apps.

More time getting work done.

CTA: Start Your Free Trial

8. Email Campaign

Email 1 — Introduction

Subject: Your team's work shouldn't be this scattered

How much time does your team spend looking for tasks, checking deadlines, and asking for project updates?

FlowPilot brings your team's work into one simple workspace.

Manage tasks, deadlines, communication, and progress without constantly switching between tools.

Ready to simplify your workflow? Start your free trial.

Email 2 — Pain Point

Subject: Still chasing project updates?

If your team asks "What's the status?", "Who's handling this?", or "When is this due?" every day, your workflow may be more complicated than it needs to be.

FlowPilot gives everyone a clear view of what needs to happen, who's responsible, and what's next.

One workspace. One source of truth. Try FlowPilot today.

Email 3 — Conversion

Subject: Spend less time managing work

Your team has better things to do than spend hours organizing work.

- Organize projects
- Assign tasks
- Track deadlines
- Communicate with your team
- Monitor progress

All from one workspace. Start your free trial today.

9. Social Media Copy

LinkedIn

Your team doesn't need more productivity tools. It needs less fragmentation.

FlowPilot brings tasks, deadlines, communication, and project progress together so your team can spend less time managing work and more time doing it.

X / Twitter

Too many tools. Too many tabs. Too many "where are we on this?" messages.

FlowPilot puts your team's work in one place. Less management. More momentum.

Instagram

5 apps shouldn't be required to manage 1 project.

Tasks. Deadlines. Messages. Updates. Progress.

Bring them together with FlowPilot. Start your free trial.

10. A/B Testing Concepts

Element	Version A	Version B
Hero	Your team's work, finally in one place.	Stop managing work. Start getting it done.
CTA	Start Your Free Trial	Try FlowPilot Free
Hook	Too many tools?	Still chasing updates?
Benefit	Manage everything in one place	Spend less time managing
Angle	Organization	Productivity

Testing objective: Compare pain-point, productivity, and simplicity messages to identify which messaging resonates more strongly with the target audience. No actual performance results are being claimed because this is a self-directed project.

11. Copywriting Strategy

- Audience → Small and remote teams.
- Problem → Work is fragmented across multiple tools.
- Benefit → One centralized workspace.
- Emotional angle → Less stress and confusion.
- Functional angle → Better organization and visibility.
- Primary CTA → Start Your Free Trial.
- Testing approach → Compare different hooks, benefits, and calls to action.

12. Portfolio Case Study Description

FlowPilot is a self-directed SaaS copywriting project created to demonstrate end-to-end campaign development.

The project focuses on developing messaging for an AI-powered project-management platform targeting small businesses and remote teams.

I developed the audience profile, pain points, positioning, core messaging, landing-page copy, Google Search ads, LinkedIn advertising copy, email campaigns, social-media copy, and A/B testing concepts.

The campaign explores multiple messaging angles, including productivity, simplicity, organization, and reducing workflow fragmentation.

13. Project Details

- Project type: Self-directed portfolio project
- Industry: SaaS / Technology
- Role: Copywriter / Content Strategist

- Deliverables: Landing page, advertising copy, email campaign, social media, messaging strategy, and A/B testing concepts.
